

Lite Mount Kits (AF)

The Lite Mount AF ball clamps provide articulated joint for quick, easy adjustments and streamlined connections for switch mounting. The tubes used with AF ball clamps have a ball end at one or both ends to fit into the connector. The bolt in the AF ball clamp secures the joint with a 5mm hex tool.

KEY FEATURES:	DEFAULT CONFIGURATION:	CAUTION:
<ul style="list-style-type: none"> Streamlined and adjustable ball clamp joints Easily removed from wheelchair Support switches and lightweight items up to 5lbs/2.3Kg 	<ul style="list-style-type: none"> Wheelchair quick release clamp for 1 inch frame; alternate attachments available Switch flange end fitting 2 inch (Buddy button); can be swapped out for different sizes and styles The bolt in the AF Ball Clamp secures the joint. A 5mm hex tool (Allen key) is required for adjustments 	<p>Avoid overloading. Overload force will move joints and may damage tube connections.</p>
