

## Vertical Desk Stand (VDS)

The Vertical Desk Stand (VDS) is a height adjustable desk stand. The VDS has an articulating Quick Release Base for a broad range of angular adjustment. The VDS can be used in conjunction with a DAESSY wheelchair mount.

### KEY FEATURES:

- Adjustable quick release for extensive device positioning\*
- Ideal companion for a DAESSY wheelchair mount
- Usable on most desk surfaces
- Supports devices up to 15lbs/6.8Kg
- Height adjustable up to 17 inches\*\*

### DEFAULT CONFIGURATION:

- Default AQRL-87 Articulating Quick Release Base, requires tool for adjustment

### CAUTION:

- With large devices it is important to ensure the device is within the base area of the Desk Mount to reduce any tendency to tip
- It must be recognized that the Desk Mount may slide about some surfaces when the device or touch screen is directly accessed

**Customization:** Alternate quick release base options available with quick handles for adjustment of device angle/rotation and for adjustment of height on the vertical tube. Small face quick release base available on request.

\* The mount depicted includes optional quick release base with quick handles.

\*\* Maximum height measured from table surface to middle of quick release base.
